SUMMARY

Recent Information Technology graduate with a Bachelor's degree in Computers and Information Technology from the Egyptian E-Learning University, in a joint program with Fayoum University. Frontend Developer with hands-on experience in Angular, TypeScript, JavaScript, HTML, CSS, Bootstrap, Tailwind CSS, and Angular Material through graduation and personal projects. Experienced in building modern web apps using Angular Signals, zoneless change detection, Firebase (Authentication and Firestore), and Vercel serverless proxies, with responsive, unit-tested interfaces. Skilled in leading development teams and integrating Angular applications with REST APIs. Strong foundation in object-oriented programming, databases, and problem-solving.

EDUCATION

Egyptian E-Learning University (EELU) - Fayoum Joint Program Sep 2022 - Jul 2026
Bachelor of Computers and Information Technology
Grade: Very Good with Honors | Graduation Project: Excellent

CERTIFICATIONS

- Frontend Development Diploma - Route IT Training Center | 2025
- Programming Fundamentals Diploma - Route IT Training Center | 2024
- CCNAv7: Introduction to Networks - Cisco Networking Academy | 2024

PROJECTS

VOYAGO - Tourism Management & Trip Planning Platform

Team Leader & Frontend Developer | Angular 17+, TypeScript, RxJS, Tailwind CSS, REST APIs, JWT Auth, Cloudinary, Responsive Design, Dark/Light Mode

- Led a team in developing a web-based tourism platform designed to simplify trip planning and booking in Fayoum.
- Built a complete admin dashboard using Angular Material, Bootstrap, and REST APIs to manage users, bookings, content, and system configurations.
- Developed responsive user interfaces using Angular and integrated the frontend with REST APIs provided by the backend team.
- Built features for hotels, restaurants, tourist attractions, tour guides, bookings, payments, emergency services, and budget planning.

Live Demo: https://voyago-gamma.vercel.app/home

Job Application Tracker

Frontend Developer | Personal Project | Angular 21, TypeScript, Signals, Firebase (Auth + Firestore), Angular CDK, Vitest, Vercel

- Built a job-search tracker with Google sign-in and real-time sync across devices using Firebase Authentication and Cloud Firestore, with per-user data protected by security rules and offline support.
- Architected a signals-based store behind a repository pattern that isolates Firestore from the UI, enabling 63 unit tests (Vitest) that run without network access.
- Implemented a drag-and-drop Kanban board (Angular CDK) with optimistic status updates, follow-up reminders with overdue tracking, and a dashboard with computed stats.
- Designed a responsive, accessible interface (table-to-card layout, swipeable board, reduced-motion support) and added a one-time import to migrate local data to the cloud.

Cine Movie Explorer

Frontend Developer | Personal Project | Angular, TypeScript, RxJS, TMDB API, Vercel

- Built a movie discovery app with Angular signals and zoneless change detection, featuring adaptive theming driven by poster color extraction.
- Implemented debounced search, URL-driven genre filtering, pagination, and a cross-tab-synced watchlist using localStorage.
- Secured the TMDB API token with a Vercel serverless proxy and deployed with SPA rewrites; fully responsive and keyboard-accessible.

Live Demo: https://movie-explorer-six-omega.vercel.app/

Central Finds - E-Commerce Platform

Frontend Developer | Personal Project | Angular, TypeScript, SCSS, RxJS, REST API, Vercel

- Developed a modern, fully responsive e-commerce web application using Angular and TypeScript with Angular Router for seamless navigation.
- Implemented core features including dynamic product browsing, detailed product pages, shopping cart with quantity management, wishlist functionality, and checkout flow.
- Consumed REST APIs with RxJS for product data and persisted cart, wishlist, and preferences client-side using localStorage.
- Built clean, scalable UI components with SCSS and client-side form validations for enhanced user experience.

Live Demo: https://central-finds.vercel.app/

Authentication & User Management Application

Frontend Developer | Personal Project

- Developed a responsive client-side authentication flow with login, registration, and form validation.
- Implemented state management and seamless UI integration for authentication workflows.

Live Demo: https://auth-app-liard-xi.vercel.app/login

Weather Application

Frontend Developer | Personal Project | HTML, CSS, JavaScript

- Built a responsive weather app that fetches data from a weather API and displays live conditions in a clean interface.

Live Demo: https://bassantezzat.github.io/weather/

TECHNICAL SKILLS

Frontend Development: Angular, Angular Signals, Angular CDK (Drag & Drop), TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Bootstrap, Tailwind CSS, Angular Material, RxJS, Reactive Forms, Unit Testing (Vitest), Dark/Light Theming, Responsive Design, Performance Optimization, Debugging

Backend & Fundamentals: REST APIs, RESTful Services, JWT Authentication, Firebase (Authentication, Cloud Firestore, Security Rules), Cloudinary, Node.js (Beginner), Backend Development Fundamentals

Programming Languages & Core Concepts: Java, C++, Python (Beginner), Object-Oriented Programming (OOP), Database Fundamentals

Tools & Deployment: Git, GitHub, Vercel (Serverless Proxy), Vitest

LANGUAGES

Arabic: Native | English: Upper-Intermediate
