PROJECTS

VOYAGO - Tourism Management & Trip Planning Platform

2026

Team Leader & Frontend Developer

- Led a team in developing a web-based tourism platform designed to simplify trip planning and booking in Fayoum.
- Developed responsive user interfaces using Angular and integrated the frontend with REST APIs provided by the backend team.
- Built features for hotels, restaurants, tourist attractions, tour guides, bookings, payments, emergency services, and budget planning.
- Used Bootstrap, Tailwind CSS, Angular Material, and Git for frontend development and collaboration.
- Live Demo: <https://voyago-gamma.vercel.app/home>

Angular Web Application

Frontend Developer | Personal Project

- Developed a web application using Angular and TypeScript.
- Built reusable and responsive user interfaces using component-based frontend development.
- Live Demo: <https://angular-app-iota-two.vercel.app/#/home>

Weather Application

Frontend Developer | Personal Project

- Developed a responsive weather application using HTML, CSS, and JavaScript.
- Integrated weather data through an API and displayed dynamic weather information in a user-friendly interface.
- Live Demo: <https://bassantezzat.github.io/weather/>

Authentication & User Management Application

Frontend Developer | Personal Project

- Developed a secure, responsive user authentication web application featuring login, registration, and user management flow.
- Implemented client-side form validation, state management, and seamless UI integration for authentication workflows.
- Live Demo: <https://auth-app-liard-xi.vercel.app/login>
